

Package ‘PSS.Health’

April 8, 2021

Type Package

Title Power and Sample Size for Health Researchers via Shiny

Version 0.1.6

Date 2021-04-07

Language pt

Description Power and Sample Size for Health Researchers is a Shiny application that brings together a series of functions related to sample size and power calculations for common analysis in the healthcare field. There are functionalities to calculate the power, sample size to estimate or test hypotheses for means and proportions (including test for correlated groups, equivalence, non-inferiority and superiority), association, Pearson's correlation coefficient, regression coefficients (linear, logistic and Cox), linear mixed model, Cronbach's alpha, interobserver agreement, intraclass correlation coefficients, limit of agreement on Bland-Altman plots, area under the curve, sensitivity and specificity incorporating the prevalence of disease. You can also use the online version at https://hcpa-unidade-bioestatistica.shinyapps.io/PSS_Health/.

Imports DT, easypower, EnvStats, epiR, ICC.Sample.Size, kappaSize, longpower, plotly, powerMediation, powerSurvEpi, presize, pROC, pwr, pwr2, shiny, shinycssloaders, shinyFeedback, shinyhelper, tidyverse, writexl

PSS_Health	<i>This function will start the Shiny application</i>
------------	---

Description

Run locally an interactive Shiny application for Power and Sample Size determination.

Usage

```
PSS_Health()
```

Note

You can also use the online version at https://hcpa-unidade-bioestatistica.shinyapps.io/PSS_Health/

Author(s)

Unidade de Bioestatística, Grupo de Pesquisa em Pós Graduação, Hospital de Clínicas de Porto Alegre.
